

Education

MSc in Computer Science, University College Dublin, Ireland

Sep 2026 – Sep 2027

BTech in Computer Engineering, Parul University, India

Aug 2020 – Apr 2024

Skills

Languages: Java, Python, JavaScript

Frameworks: Angular, React.js, React Native, Next.js, Django REST, Express.js

Databases & Tools: MySQL, Postgres SQL, MongoDB, Docker, Kubernetes, AWS, Helm

Work Experience

Software Engineer I — Quickwork

Aug 2024 – Jul 2026

- Worked as a Software Engineer I with a MEAN stack, designing, developing, and shipping full-stack web applications for 20+ international clients.
- Delivered custom software solutions for enterprise clients including DMI, Axis Bank, and IBL, translating business requirements into scalable, production-ready features.
- Designed and built automation workflows and bots that integrated multiple third-party applications, streamlining client business processes and reducing manual effort.
- Built and maintained RESTful APIs and backend services, deploying and scaling infrastructure on AWS to support large-scale, high-availability systems across 20+ international clients.
- Collaborated with cross-functional, international teams across the full development lifecycle — from requirements gathering and design through deployment and client handoff.

Full Stack Developer Intern — Sahayata24X7

Apr 2024 – Jun 2024

- Worked across the full stack — building frontend features in React.js and backend APIs with Django REST Framework — on a small, close-knit startup team.
- Owned end-to-end feature development, from API design through frontend integration, collaborating directly with founders and engineers in a lean team structure.

Back-End Developer Intern — Ignition Nest Labs

Dec 2023 – Mar 2024

- Developed server-side features for startup web applications, handling business logic, data models, and API endpoints, and collaborated with cross-functional teams on early-stage product architecture.

Django Developer Intern — Infolabz

Jul 2023 – Aug 2023

- Developed dynamic web applications using Django, working alongside senior engineers on real production features.

Volunteering Experience

Volunteer — WomenTech Network

Feb 2024 – Apr 2024

- Volunteered online for the Women Tech Global Conference (WTGC), an online conference supporting diversity and women's empowerment in tech.
- Promoted a session to a global audience via social media, driving 200+ attendees from around the world.

Microsoft Student Ambassador — Microsoft Learn Student Ambassadors

Nov 2023 – Apr 2024

- Organized and led several online and offline workshops on Git and Microsoft tools, reaching 60+ college students.
- Raised awareness of Microsoft products and services on campus, connecting peers with Microsoft learning resources and fostering a collaborative student tech community.

Project

NebulaThread

Mar 2025 – Apr 2025

- Built a Next.js-based SaaS platform with a queue based scheduling engine, enabling users to create modify and schedule AI powered web scraping workflows.
- Tech: JavaScript, Nextjs, Typescript, SQLite
